Radiation grafting, 665
Radiation-induced polymerization, 199
Radioactive tracer, 373
Radiographic quality control, 31
Rate of strain, 731
Rats, 343
Red blood cells, artificial, 211
relaxation, 813(N)
Replacements, 537(N)
Roughness, 665

Scanning electron microscopy, 251, 765
Selective coating, 743
Serum, 173(N)
Serum proteins, 705
Short term bonding, 225
Shoulder preparation, 239
Single crystal Al_2O_3, 597
Skeletal bonding, 225
Skin, 65, 107, 339(E), 511
—, artificial, 65, 339(E)
Skin grafting, 65, 107, 339(E), 511
Slow compressive strength, 383
Slow release, 185
Slow release of antibiotics by polymer entrapping, 185
Soft contact lenses, 557
Soft denture liners, 731
Soft liners, 731
Soft tissue implants, 1
Sorbent for hemoperfusion, 743
Stainless steel, 31, 587
Stereological analysis, 343
Streptococcus mutans, 653

Structure, 41
Surface characterization, 665
Surface coverage, 639
Surface effects, of platelet adhesion, 499
Surface reactions, 55
Surface ultrastructure, 11
Surgical alloy, 639
Suture material, 251
Sutures, 329

Tanning agents, 753
Thermal compatibility, 435
Thermal expansion, 435
Three dimensional finite element analysis, 23
Thrombin, 619
—, adsorption, 467
α-Thrombin, reactivity, 467
Thrombogenicity, 251
Tissue adhesive degradation *in vitro*, 93
Tissue mechanics, bone, 41
Tooth mineral, 83
Tooth replacement, 537(N)
Total hip joint, 311
Tracheal tube cuffs, 11
Tumor, response to implanted polymer, 455
—, response to implanted polymers, 447

Ultrahigh-molecular-weight polyethylene, 567
Urokinase, 199

N-vinylpyrrolidone, 557
In vivo biocompatibility, ceramics, 177(N)
In vivo model for pulp, 631

Wound management, 65, 107, 339(E)
